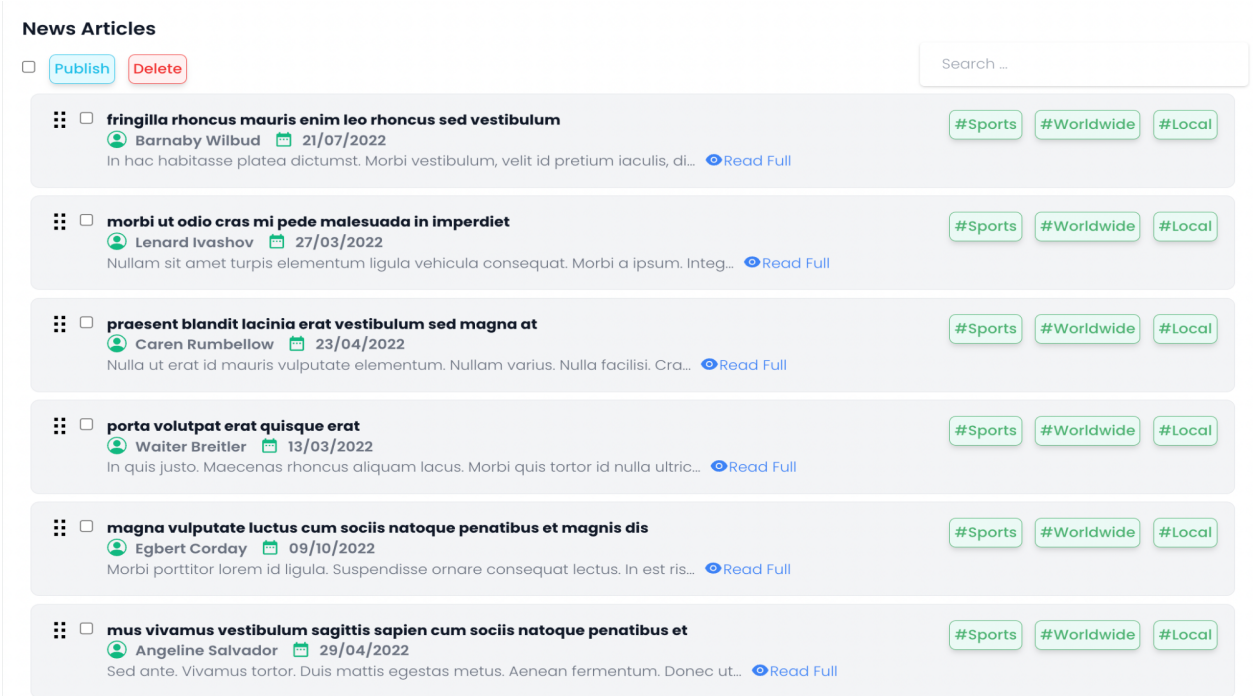
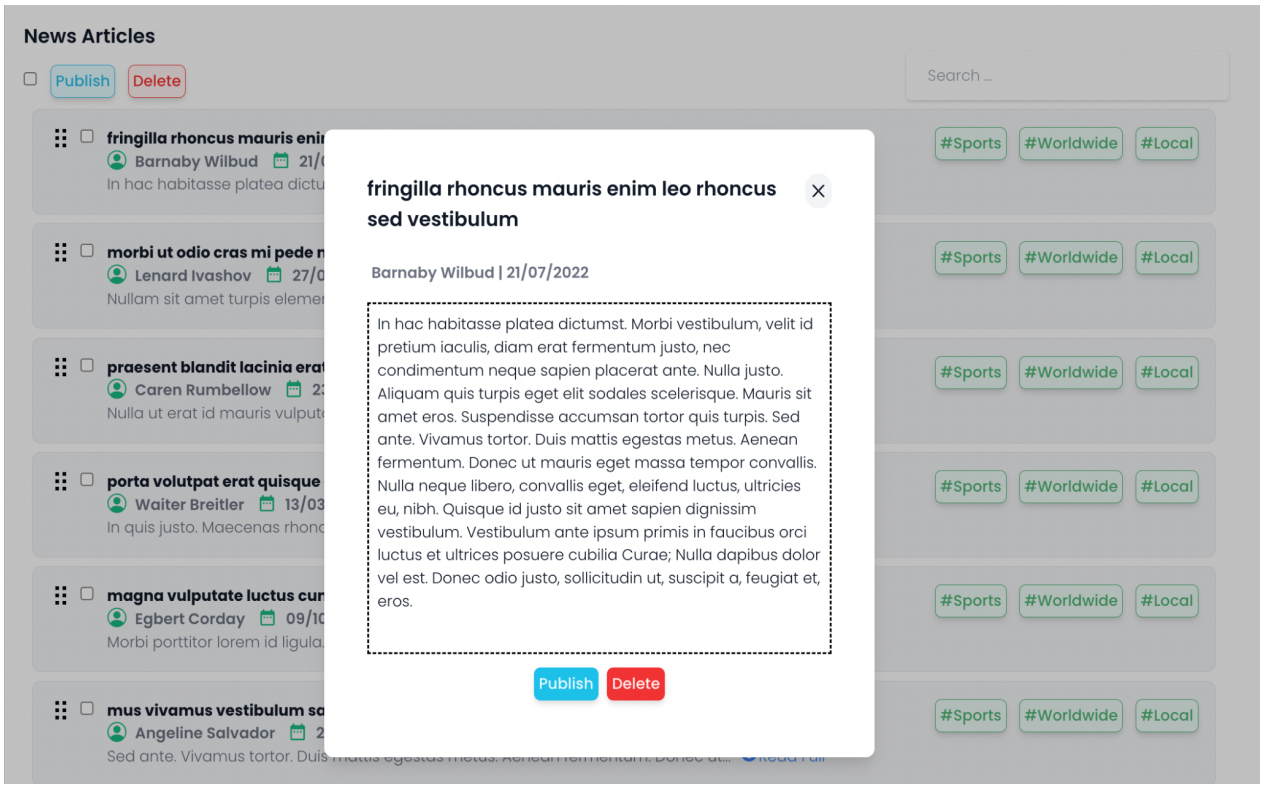
Description:

Convert the layout below into a working web page using **HTML, CSS,** and **JavaScript (ReactJS)**.

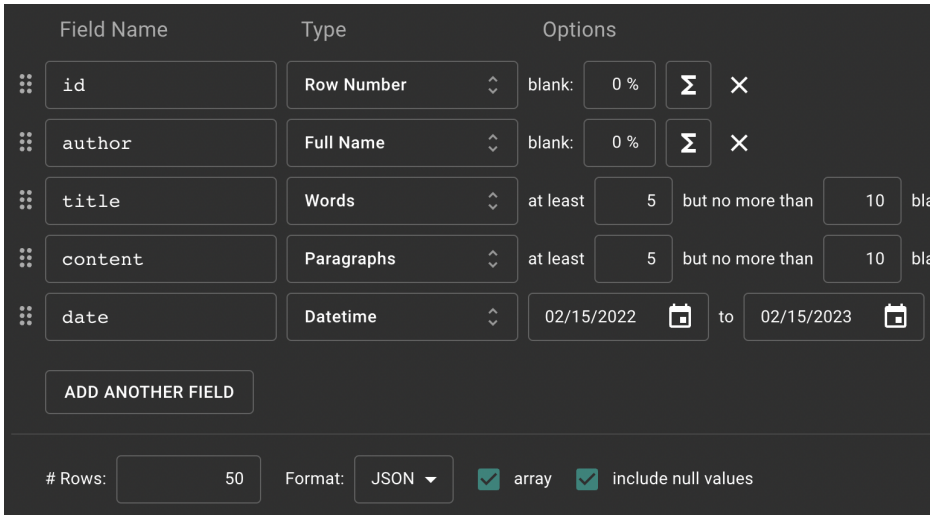




Requirements:

1. **Dummy Data**

   Go to https://www.mockaroo.com/ then create 50 dummy records (JSON format) with the following items:



2. **Functionalities**
   a. Display the items as shown on the layout
   b. When the "Read Full" is clicked, it should display the details on a modal/pop-up. Buttons inside the modal/pop-up are **not** required to be functional.
   c. If Delete button on the landing page is clicked, the checked item/s should be removed from the list

   Take Note: Publish Button, Hashtag Buttons, and Search Bar on the landing page are **not** required to be functional as well.

3. Save the project in a GitHub public repository and invite the following accounts as collaborators
   a. adrian.silva@lophils.com
   b. sav.estidolajr@lophils.com
   c. krizia.frias@lophils.com

4. Please add a readme file with the details on your GitHub public repository.
